INSTRUMENTS AND EXPERIMENTAL TECHNIQUES

Volume 28, Numbers 1-6, 1985

(A translation of Pribory i Tekhnika Éksperimenta)

Volume 28, Number 1, Part 1 January-February, 1985

	Engl.	Russ.
Simulating Charged-Particle Tracks in Radiation Detectors by Means of X-Ray and Laser Beams (Review) — E. M. Gushchin, A. N. Lebedev, and S. V. Somov	1	7
NUCLEAR EXPERIMENTAL TECHNIQUES		
6.5-Mev Microtron with External Injection — É. G. Gal', V. N. Eponeshnikov, and N. A. Lashuk	18	24
Accelerating System for Hollow Ion Beams — V. A. Vlasov, N. M. Gavrilov, R. K. Gavrilova, and V. V. Rassadin	22	27
Injection System for Small Betatron — V. P. Zvorygin, V. S. Pushin, and V. L. Chakhlov	26	31
Triple-Beam Negative Hydrogen-Ion Source Based on Water Vapor — V. V. Parkhomchuk and N. Kh. Kot	29	34
Device for Measuring the Beam Current in a Linear Induction Accelerator — M. I. Demskii and A. N. Popov	32	36
Small Pickup for Current and Profile of Beam of Pulsed Electrostatic Proton Accelerator — V. N. Getmanov	35	39
Influence of Beam of Synchrotron Radiation on a Crystal Monochromator — N. V. Andronova, A. N. Artem'ev, M. V. Zelepukhin, Yu. N. Kazakov,* E. P. Stepanov, and A. I. Chechin	40	43
Liquid-Tritium Target with Working Temperature Adjustable in the Range from 20.6 to 40°K — V. M. Bystritskii, J. Wozniak, A. Gula, V. P. Dzhelepov, V. G. Zinov, E. Lotzki, V. A. Stolupin, and Sh. G. Shamsutdinov.	43	46
Calorimetric Calibration of Pyroelectric Gamma-Radiation Detectors — R. Ya. Strakovskaya and A. G. Stas'	45	48
Detection of Light Flashes in a CsI(TI) Scintillator with the Aid of a Semiconductor Detector — Yu. G. Zdesenko and B. N. Kropivyanskii	47	50
Scintillation Properties of Liquid Xenon — I. R. Barabanov, V. N. Gavrin, and A. M. Pshukov	50	52
Cadmium Telluride Gamma-Radiation Detectors with a High Energy Resolution — L. A. Alekseeva, P. G. Dorogov, V. I. Ivanov, and A. Kh. Khusainov	52	54
Corrections for Nuclear Interaction during the Detection of Light Nuclei in an NaI(TI) Crystal — L. I. Abashidze, V. V. Avdeichikov,* A. I. Bogdanov,* V. A. Budilov, J. Zlomanczuk,† N. K. Zhidkov, V. D. Maisyukov,‡ V. A. Nikitin, P. V. Nomokonov, and A. A. Povtoreiko	57	58
EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY		
Multipurpose Measurement-and-Control Complex Using D3-28 Computer — A. L. Aleksandrov, B. G. Ignatov, A. N. Ponomarev, L. Z. Pososhenko, and V. E. Sizov	62	62
Interfacing F4222 Analog Digital Converter with 151PG32-003 Computer Complex — M. V. Grinberg and P. E. Nazarov.	66	66

	Engl.	Russ.
Interface for Mössbauer Spectrometer — V. A. Evdokimov, Yu. G. Kononov, A. S. Lobko, and A. A. Fedorov	70	70
Data Register and Processor for Multiwire Chambers — V. V. Karpukhin	73	73
COMPEX-Compatible Manual-Control and Display Units S. G. Basiladze, V. Ya. Rakitskii, A. N. Smirnov, V. V. Suvorov, and Yu. D. Shchukin	78	77
CAMAC-Crate Balancing Using Inquiry Selector — S. G. Basiladze, A. N. Smirnov, and V. V. Suvorov	82	81
Four-Channel Digital-to-Analog Converter Module Using an "Élektronika-60" Microcomputer — A. V. Vishnevskii, A. P. Latyntsev, and V. G. Cherepanov	84	84
Device for Input of Frequency Signals for Microprocessor Systems A. V. Klement'ev, V. S. Gutnikov, and S. A. Miranyan	88	87
Device for Transfer of Data from an LP4840 Multichannel Analyzer to an "Élektronika D3-28" Computer — M. B. Breslav-Maslennikov, A. G. Dutov, A. N. Igumentsev, and Yu. I. Sudak	90	89
Linking of an "Élektronika D3-28" Microcomputer to V7-16 Digital Voltmeters for Simultaneous Measurement of Several Process Parameters — M. S. Kosilov, S. P. Slukhaevskii, A. G. Bocharov, and N. S. Kosilov	93	92
Linking of the "Élektronika D 3-28" Computer to the EUM-23 Printer — V. V. Bonch-Bruevich, A. V. Stepanov, and I. V. Yaminskii	96	95
CAMAC-Compatible Graphics Module — D. V. Togatov, A. V. Ermakov, V. S. Ivanov, and K. O. Kallistov	98	98
ELECTRONICS AND RADIO ENGINEERING		
Root-Mean-Square Pulse-Amplitude-to-Number Converter — V. V. Trifonov and A. N. Gorbachev	101	101
Control Unit and ADC for Automated System of Laser Probing of the Atmosphere in the CAMAC Standard —V. I. Kabelka, A. A. Milyauskas, and R. V. Moteyunas	103	103
Wide-Range High-Speed Analog-to-Digital Converter — V. P. Doroshev, A. M. Belov, A. A. Ivanova, and V. E. Yamnyi	106	106
Random Pulse Generator —V. G. Zinov and A. V. Selikov	110	110
Shaper for High-Voltage Subnanosecond Voltage Jumps by Means of Semiconductor Diodes with Avalanche-Breakdown Delay — S. I. Zienko	114	113
Collector for Conducting High Pulse Currents to Small-Size Load — I. Yu. Beneskriptov, S. I. Dashkina, V. A. Krylov, B. A. Larionov, G. M. Makeev, V. F. Soikin, and V. A. Churaev	119	117
Appendix	125	

Volume 28, Number 1, Part 2 January-February, 1985

Narrow-Band Amplifier with a Synchronous Filter for the Frequency Range 50 Hz to 6 MHz — G. I. Telegin	131	121
A Wide-Band Resistance Transformer — V. M. Nemirovskii and V. M. Sinyavskii	133	123
Variable Scaler — V. N. Maslii and A. A. Kulik	135	125
Pickup for Pulse NMR Spectrometer — V. N. Zaitsev and A. K. Podsekin	137	126
Thyristor Switch for the Protection of Superconducting Magnetic Systems — P. V. Aksenov and S. B. Pologikh	139	129
Electronic Protection of High-Power Rectifiers from Current Overloads — I. Ya. Butov and A. N. Kuzyutin	141	130
Universal Current Source for Avalanche Transit Diodes — N. M. Zakarlyuk and V. Ya. Noskov	143	132
Programmable Photomultiplier Power Supply — E. L. Kantor, V. V. Lantsov, and V. M. Potapov	145	134

GENERAL EXPERIMENTAL TECHNIQUES

High-Perveance Electron Guns with Vacuum-Tight Cermet Bodies — N. S. Zinchenko, V. I. Afanas'ev, G. D. Zaitsev, V. A. Sokolova, and N. E. Khoroshailo 148 137

An Electron Gun with a Plasma Emitter — V. A. Gruzdev, Yu. E. Kreindel', N. G. Rempe, and O. E. Troyan 151 140

A Nozzle Array and Ballast Resistance for Producing a Glow Discharge in a Gas Flow — V. I. Alferov, A. S. Bushmin, and L. M. Dmitriev 155 143

The One-Electron Pulse-Height Resolution as a Characteristic of Open-Type Secondary Electron Multipliers — M. A. Gruntman 157 144

System for Suppressing Interference, Drift, and Noise in Magnetooptical Apparatus — V. N. Dudorov, M. V. Logunov, V. V. Randoshkin, and V. D. Chervenkov. 159 146

Image Converter Tube for Photography with Subnanosecond Frame Times — T. S. V'yugina, V. M. Zhilkina, T. A. Il'ina, M. I. Krutik, V. B. Lebedev, V. P. Seleznev, B. M. Stepanov, V. N. Syrtsev, and G. G. Fel'dman. 162 149

Optimization and Application of the Criterion for the Selection of Photodetectors for Photon Counting — I. R. Gulakov, A. N. Pertsev, and S. V. Kholondyrev 165 151

Application of Streamer Semiconductor Lasers to the Study of the Transient Characteristics of Pulsed Photocells — V. A. Gavanin, V. A. Maksimov, A. Z. Obidin, A. N. Pechenov, Yu. M. Popov, and V. A. Frolov. 168 153

Wide-Band Pyroelectric Detector of Low-Power Radiation in the 10-20-μm Waveband — A. O. Kulikov, V. K. Novik, A. I. Fedoseev, A. G. Shul'ga, and S. M. Shutov. 171 155

Single-Line TV Spectrographic Attachment Based on a K1200TsLI Charge-Coupled Device — M. B. Alekseev, Sh. Kh. Adityarov, and V. A. Artemov 173 158

Investigation of a CCD Wave Front Sensor of an Adaptive Optics Radiation Focusing System — V. A. Arutyunov and S. M. Slobodyan 176 160

A Submillimeter Laser Interferometer with Interference-Field Visualization — A. A. Lash and D. N. Yundev 179 162

A Matrix Analyzer for the Intensity Distribution in a Laser Beam — R. M. Rakhimov, O. R. Badrutdinov, I. S. Fishman, and V. N. Leibov 181 164

A Compact Sectional Gas Laser with Longitudinal Excitation — A. E. Martirosyan and V. O. Papanyan. 184 166

A Laser with a Flowing Dye Solution — M. V. Korzhik and V. V. Kuz'min. 186 168

Producing Nanosecond and Subnanosecond Laser Pulses with Fast Shutters — V. V. Volenko, A. F. Ivanov, L. A. Myalitsin, L. A. Osadchuk, and A. I. Saukov. 189 170

Signal Splitter in Electric-Reflection Spectrometer — E. I. Veliyulin, R. Kh. Lyapin, S. A. Musaev, and B. M. Rustambekov. 192 174

Automatic Capacitance Spectrometer for Measurement of the Parameters of Deep-Lying Centers in Semiconductors — S. S. Shaimeev. 194 175

Apparatus for the Study of Dislocation Dynamics in Crystals at a Pressure of up to 1.5 GPa — G. N. Ermolaev and S. I. Ninenko. 197 178

Self-Oscillating Measuring Circuit for the Internal Friction of Solids — V. S. Postnikov, Yu. A. Kapustin, V. S. Borisov and Yu. K. Shlyk. . . 200 180

MIR — A High-Power X-Ray Source — E. V. Znatnov, V. D. Korolev, V. V. Matveev, V. V. Prut, V. P. Smirnov, and A. S. Chernenko 203 183

Vacuum X-Ray Spectrometers with Position-Sensitive Detectors — V. E. Dolgikh, V. M. Cherkashenko, É. Z. Kurmaev, D. A. Goganov, E. K. Ovchinnikov, Yu. M. Yarmoshenko, and T. P. Toporkova 207 186

Semiautomatic X-Ray Spectrometer for Diffraction Studies with Total External Reflection — A. L. Golovin, Yu. F. Dmitriev, and D. V. Novikov 211 190

Low-Temperature Attachment to X-Ray Diffractometer for Study of Single-Crystal Tensile Deformation — M. Yu. Lavrenyuk and N. Ya. Minina 217 196

Differential Ultrahigh-Vacuum Pump for Electron Microscope — A. A. Kroshkov, É. A. Baranova, O. A. Yakushenko, A. V. Latyshev, A. L. Aseev, and S. I. Stenin 220 199

Superconducting Conductivity-Modulator for Wide Helium-Temperautre Range — Yu. N. Tszyan 224 202

LABORATORY TECHNIQUES

Digital Synchronous Follow-Up System — V. N. Govorun, V. I. In'shakov, A. P. Leonov, V. V. Popov, V. V. Skvortsov, E. A. Ustinov, and N. N. Chernyavskii 227 205

Active Rejector Filter — A. G. Kuchinskii, S. G. Pirogov, V. M. Savchenko, and A. K. Yakushev 230 208

A Gland Seal for a Pressure Multiplier — A. P. Kurshin 231 209

Hollow-Cathode Evaporators — V. A. Saenko, A. I. Vladimirov, G. N. Veremeichenko, and V. A. Kravatskii 234 210

Thermionic Evaporation of Films of Multicomponent Chalcogenide Semiconductors — T. I. Sergienko, V. V. Petrov, A. A. Kryuchin, G. Yu. Yudin, and K. P. Gritsenko 239 215

Protection of Optical Windows of Vacuum Chambers from Evaporation Products — V. I. Zavidei, A. V. Pustogarov, O. A. Povalyaev, and A. N. Konotopov 241 216

Compact Pyroelectric Detector — A. S. Elizarov, E. G. Kostin, Yu. A. Kulyupin, V. S. Lysenko, L. A. Matsuta, and O. P. Panasyuk . . . 243 218

Supply Source for Electric Arc Welding of Optical Fibers — V. D. Nazarov, Yu. I. Sachko, and A. G. Tereshchenko 246 220

Equipment for Measuring Time Constants of High-Speed Photodiodes — P. I. Borisova, Yu. V. Vorob'ev, N. Z. Derikot, V. N. Zakharchenko, É. A. Ismagilova, and V. V. Karpov. 248 222

Use of the P136M dc Voltage Regulator for Automatic Recording of Current–Voltage Characteristics — A. T. Dideikin. 250 224

Chamber for Electric Studies at Temperatures to 2100°K — I. V. Bozhko. . . . 251 225

Programmable Rotator — I. D. Voronov, V. M. Zaikin, E. I. Kozedub, and V. V. Pashkov 254 227

Bidirectional Angle-to-Digit Converter — V. N. Bulanov and K. A. Aleksandrov 256 229

Pneumatic Press for Low-Temperature Optical Measurements with Uniaxial Deformation — A. P. Abramov, I. N. Abramova, I. Ya. Gerlovin, and I. K. Razumova. 258 231

Measuring the Specific Heat of Resistive Heat-Sensitive Elements at Cryogenic Temperatures — V. I. Datskov, E. D. Kleshchenko, and S. V. Muntyan 260 233

Electrical and Magnetic Properties of Manganin at Low Temperatures — V. M. Beilin, L. A. Serebrenik, and V. A. Fradkov 263 235

Volume 28, Number 2, Part 1 March-April, 1985

Emission Track Detectors (Survey) — A. I. Bolozdynya. 265 5

NUCLEAR EXPERIMENTAL TECHNIQUES

Experience with Operational Control of the Cross Section of an Electron Beam in a Synchrotron — V. A. Orlov, K. N. Shorin, and A. S. Yarov 286 24

Adjustment and Monitoring of the Parameters of the High-Voltage System of a Streamer Chamber — L. S. Vertogradov, T. A. Lomtadze, B. A. Khomenko, and G. A. Shelkov. 289 26

Ways of Increasing the Voltage in Tunable-Frequency Accelerating Cavities — I. I. Averbukh and M. M. Karliner 292 29

Experiments on the Generation of Pulses of Supplementary Accelerating Voltage on the INUS-3 Machine — V. A. Burtsev, O. A. Gusev, B. N. Il'in, E. M. Mellekh, E. P. Pavlov, O. P. Pecherskii, and N. P. Shchegolikhin. 295 32

Bipolar Generator of Voltage Pulses of Amplitude ±600 kV — A. V. Bannikov, L. S. Vertogradov, A. K. Dzhavrishvili, T. A. Lomtadze, A. I. Kharchilava, and G. A. Shelkov 300 36

Influence of Time Characteristics of Beam Extraction on Coherent Bremsstrahlung Spectra — R. O. Avakyan, A. É. Avetisyan, N. A. Zapol'skii, R. Ts. Sarkisyan, Kh. A. Simonyan, S. P. Taroyan, and A. R. Tumanyan 304 39

Thermostat for Neutron-Diffraction Apparatus — E. N. Kozlov, V. O. Nikolaev, S. E. Tsirkunova, and S. N. Skovorod'ko. 308 43

	Engl./Russ.	
Improvement of the Reliability of Wide-Gap Spark Chambers Operating in the Storage Regime — V. A. Mikhailov.	311	45
Study of the Characteristics of a Drift Chamber in a Beam of Slow Nuclear Fragments — A. A. Budilov, Yu. V. Zanevskii, J. Zlomanczuk, V. D. Maisyukov, A. Nawrot, V. A. Nikitin, P. V. Nomokonov, V. D. Peshekhonov, and L. A. Urmanova	314	48
Drift Chambers in a Self-Quenching Streamer Regime — G. G. Alekseev, V. I. Ganichev, O. E. Gorchakov, N. A. Kalinina, V. V. Karpukhin, V. V. Kruglov, A. V. Kuptsov, L. Luchan, V. P. Pugachevich, D. M. Khazins, A. S. Chvyrov, and M. N. Shumakov	319	52
Large Liquid Scintillation Counter — N. I. Bozhko, A. S. Vovenko, V. Yu. Glebov, V. N. Goryachev, V. I. Kochetkov, V. I. Kvartsov, V. I. Poletaev, Yu. I. Salomatin, V. N. Rychenkov, S. K. Chernichenko, R. M. Fakhrutdinov, and G. L. Shchukin	325	57
Distinctive Features of the Fabrication and the Characteristics of Coaxial Si(Li) Nuclear Radiation Detectors — N. P. Afanas'eva, L. I. Pashuk, and A. K. Pustovoit.	330	61
EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY		
Dialog System for Automatic Data Input/Output and Processing with Two BÉSM-6 Computers — Yu. N. Belyaev, Yu. P. Gorlov, S. V. Makarychev, A. A. Monakhov, and S. A. Shcherbakov.	334	65
Interfacing AI-256-6 Pulse Analyzer with Élektronika-60 Microcomputer — V. V. Abarikhin and S. G. Shmelev.	338	69
Using the Élektronika MK-46 Calculator in a Measurement Complex — S. D. Sozontov	342	73
Using the Élektronika MK-46 Microcalculator for Automatic Processing of Experimental Data — V. K. Narkyavichyus and G. Rachyukaitis . .	343	74
Unification of Status Registers of Multiprocessor-Highway Controllers — S. G. Vasiladze, V. M. Rybnikov, and O. Z. Éloev	346	77
Line and Line-Switch Parameters in Crate Highways of Modular Systems — K. É. Érglis	353	83
Ancillary Logic for Fastbus Segment — A. A. Bratskii, M. Yu. Matveev, and V. G. Rybakov.	357	87
Exchange Circuits for Fastbus Slaves — A. A. Bratskii, M. Yu. Matveev, and V. G. Rybakov.	363	93
Exchange Circuits for Fastbus Masters — A. A. Bratskii, M. Yu. Matveev, and V. G. Rybakov.	368	99
Discrete-Scanning Data Acquisition System Based on Multichannel Pulse Analyzer — A. A. Krokhotkin, V. A. Slemzin, and A. I. Shurygin . .	374	104
Data Acquisition System for Scanning Auger Attachment to Electron Spectrometer — N. V. Egorov, A. G. Karpov, and V. V. Yanovskii . .	376	106
Preselector of Useful Events — S. V. Alchudzhyan.	378	108
Device for Geometric Transformations of Outline Images — V. A. Afanas'ev, V. I. Lachugin, and V. I. Sobolev	381	111
Programmable Input Protection for Modules of Series ASVT-M — J. Majerhoferova and V. Škarda	384	113
Precision Analog-Digital Converter for Microcomputers — V. I. Kosov, V. M. Malyashev, B. I. Pshenichnyi, and V. F. Shibakin	388	117
Display-to-Printer Data-Block Output Port — A. V. Isakov and Yu. S. Trofimov.	391	119
Interface for Élektronika B3-21 Calculator — I. M. Batyaev.	394	122

Volume 28, Number 2, Part 2 March-April, 1985

ELECTRONICS AND RADIO ENGINEERING		
Device for Determining the Event Time of the Absolute Maximum in a Realization of a Stochastic Process — O. V. Shchukin.	397	124
Discrete Averaging Differentiator — Yu. A. Tuflin and A. I. Dobretsov	399	126
Multichannel Analog-Digital Converter — V. R. Senchenko, V. F. Peklun, and S. V. Minenko	402	129

	Engl.	Russ.
Recording Digital Data with a Home Cassette Recorder — A. P. Pecherskikh and S. A. Larionov	405	131
Reversing-Count Pulse Former for Microprocessor Systems — S. L. Titov	409	135
Peak Voltmeter for Nanosecond Pulses — V. P. Gubanov	411	137
Charging Arrangement for Storage Capacitors of Large Size — S. D. Savov and O. E. Denchev	413	139
High-Power Pulse Modulator with Ignitron Discharger — T. E. Anisimova, E. V. Akkurator, V. A. Artemov, V. M. Gromovenko, V. P. Kalinin, and V. P. Nikonov	415	140
Infralow Frequency Band Functional Signal Generator — S. A. Belyakov and P. P. Churakov	417	142
Class D Power Amplifier — N. A. Fefelov and V. V. Ryazantaev	420	145
Differential Amplifier with Improved Common Mode Rejection at High Frequency — Va. V. Zablotskin and V. F. Zavorotnyi	422	147
Sixteen Channel Amplifier with Automatic Input Circuit Testing — V. G. Brovchenko, V. A. Luzin, and V. V. Shafirkin	423	148
Automatic Nuclear-Quadrupole-Resonance Measurements Using an Élektronika D3-28 Microcomputer — A. A. Boguslavskii, V. V. Pechenov, and G. Ya. Shapiro	426	150
Descrimination of Small Signal in Noise with Large Signal in Fourier Spectroscopy — Yu. N. Lib and M. S. Zhukov	428	152
Low-Temperature Vacuum Resonator for IRÉS-1001 and IRÉS-1003 EPR Spectrometer-Relaxometers — V. V. Troitskii, V. N. Dudkov, V. I. Muromtsev, and V. G. Cheredintsev	433	156
Circuit for Regulation and Measurement of Specimen Temperature for Circulating Thermostat of Nuclear Magnetic Resonance Spectrometer — A. I. Khayarov, A. V. Aganov, L. B. Zheltukhin, and Yu. Yu. Samitov	435	158
Broadband Dipole Measuring Antenna — L. A. Mikhalev, O. V. Ogarenko, and V. A. Tishchenko	437	160
GENERAL EXPERIMENTAL TECHNIQUE		
An Apparatus for High-Temperature Electron Irradiation in Superhard Vacuum — V. L. Arbuzov, A. E. Davletshin, S. E. Danilov, D. E. Domanskii, S. M. Klotsman, and A. L. Nikolaev	439	162
Arrangement for Studying Pulsed Cold Emission of Electrons — N. V. Egorov, K. O. Kallistov, and O. A. Kharitonov	442	165
A Local-Velocity Meter for a Hypersonic Plasma Jet — A. A. Knyazev, N. B. Lerner, and K. I. Svinolupov	445	168
The Effect of Ionizing Radiation on a Photomultiplier — D. Kh. Li, V. G. Epishev, and R. D. Radaeva	447	170
A Pulse Power Source for Tacitron Photomultipliers — B. P. Aduev, V. I. Salomatin, and V. T. Shkatov	450	172
Increasing the Isotopic Sensitivity of a Magnetic-Resonance Mass Spectrometer — Yu. A. Akulov, B. A. Mamyrin, L. V. Khabarin and V. S. Yudenich	451	173
A Mass-Spectrum Recording Device Based on a Peak-Holding Regulator — A. D. Yarmak	453	175

	Engl.	Russ.
Spectrometer with Spatial Resolution Based on a Fabry–Perot Interferometer — A. V. Balebanov, G. S. Belen'kii, V. K. Zhivotov, I. A. Kalachev, and A. V. Cheremukhin	457	179
An Apparatus for Measuring Scattered-Light Parameters — A. P. Klinko, L. D. Stepin, and A. V. Gapelyuk	459	180
Divergence Measurement of Laser Radiation by the Interference of Polarized Beams in Crystals — N. S. Kazak, A. S. Lugina, E. M. Miklavskaya, A. V. Nadenenko, V. K. Pavlenko, and Yu. A. Sannikov	461	183
Stable Laser for the Ear Infrared Region Excited by a Pulsed CO_2 Laser with Passive Quality Modulation — É. Maldutis, É. Shirmulis, and A. Filipavichyus	465	186
A Power Supply for Spectral Lamps — K. P. Kureichik, V. L. Makarov, and M. M. Mavlyutov	468	188
An Apparatus for Observing Electroluminescence in Concentrator Solar Batteries — S. V. Sidorov, A. A. Blagosklonov, V. P. Avanesyan, and A. S. Darevskii	470	190
A Cell for Measuring the Pyroelectric Effect at 90-900°K — N. E. Skorokhodov	472	192
An X-Ray Absorption Microscope — Yu. B. Glushanok, V. G. Lyuttsau, V.A. Gushchin, V. P. Efanov, M. R. Kogan, and V. I. Shaenzon	474	193
An Experimental Study of the Electrical Conductivity of Mercury in the Transcritical Region — M. M. Korsunskii	478	197
A Low-Temperature Press Fitted with a Dilatometer — A. P. Kurguzov, Yu. A. Lisovskii, Ya. M. Mukovskii, Yu. D. Otstavnov, N. A. Roshchupkin, and I. V. Fal'kovskii	482	201
LABORATORY TECHNIQUE		
A Scanning Device with Contactless Magnetoelectric Drive and Optoelectronic Angle Display for Space-Probe Instruments — P. V. Vakulov, Yu. P. Gordeev, V. V. Mel'nikov, B. I. Savin, V. Ya. Shiryaeva, and B. M. Yakovlev	485	203
Using a PROM in Schemes for Controlling Stepping Motors — P. V. Vnukov, V. Yu. Romanov, V. N. Barishnikov, and F. I. Panachev	488	206
Stroboscopic Converter for Low-Frequency Periodic Signals — V. M. Pleshkevich and A. M. Shukh	490	209
An Instrument for Examining the Thermionic Emission Parameters of Cathode Materials — V. V. Evstifeev, R. N. Evtukhov, and A. A. Kal'kov	492	211
An Electron-Heated Evaporator — L. F. Dubikovskii, V. I. Patoka, V. I. Silant'ev, N. V. Sukhoruchkin, and N. A. Shevchenko	494	212
High-Vacuum and Ultrahigh-Vacuum Planar Gates of Pendulum Type — L. V. Arinin, K. D. Danilov, E. P. Kollerov, V. I. Kazakov, O. K. Kurbatov, B. G. L'vov, and M. V. Shnitko	495	214
An Automatic Leak — B. Yu. Adamyak and N. A. Morozov	498	216
An Independent Hydrogen Source — G. F. Kobzenko, N. S. Kobzenko, A. I. Senkevich, M. V. Chubenko, and A. A. Shkola	499	217
A Valve for Corrosive Gases — S. V. Petrov	501	219
An Inductive Pressure Transducer — B. Sh. Sheftel'	502	220
Electrooptical Photographic Arrangment — A. T. Starovoitov and E. I. Snetkov	505	222

	Engl.	Russ.
Thermionic Deposition Devices (Survey) — V. A. Saenko.	509	9
NUCLEAR EXPERIMENTAL TECHNIQUES		
Long-Pulse Electron Injector with Explosive Emission and Magnetic Insulation — V. I. Artamonov, L. V. Dubovoi, V. M. Duvidzon, S. P. Kryuchkov, V. A. Maevskii, and V. I. Smilga	523	22
Trap-Control System for Polarized-Electron Source — V. L. Agranovich, V. I. Beloglazov, V. P. Efimov, and V. S. Kuz'menko	526	25
"Thin" Chamber for Measuring Profiles of Intense Beams of High-Energy Charged Particles — V. N. Gres', Yu. P. Davydenko, S. N. Lapitskii, K. K. Pokrovskii, V. E. Rakhmatov, V. S. Seleznev, and V. I. Terekhov	529	27
Window for Vacuum-to-Atmosphere Electron-Beam Extraction — A. V. Dvurechenskii and B. P. Kashnikov	531	29
Automatic Orientation System for Single-Crystal Targets in an Electron Accelerator — B. N. Kalinin, E. I. Konovalova, G. A. Pleshkov, A. P. Potylitsyn, V. M. Tarasov, V. K. Tomchakov, and I. Khakberdiev	533	31
Automatic System for Changing and Monitoring Detector Position — V. E. Apollonov, A. G. Donichkin, V. D. Dorofeev, and O. E. Shigaev	536	34
Measurement of Polarization of Coherent Bremsstrahlung of 900-MeV Electrons in Diamond for Photon-to-Electron Energy Ratio of $\leqslant 0.15$ — P. S. Anan'in, I. E. Vnukov, V. N. Zabaev, B. N. Kalinin, A. P. Potylitsyn, E. V. Repenko, V. M. Tarasov, and V. K. Tomchakov	538	36
Magnetic Spectrometer Based on Multiwire Proportional Chambers — A. M. Baranov, V. I. Baskakov, G. B. Bondarenko, P. S. Vasil'ev, I. L. Gavrilenko, B. A. Dolgoshein, V. P. Konovalov, S. P. Konovalov, A. M. Konstantinov, S. V. Murav'ev, V. K. Semenov, and A. P. Shmeleva	543	40
Time-of-Flight Heavy-Ion Spectrometer Using Detectors with Loose Dielectric Emitters — R. L. Kavalov, S. M. Luk'yanov, Yu. L. Markaryan, Yu. É. Penionzhkevich, and G. G. Chubaryan. . . .	545	42
Forward Hadron Calorimeter of European Hybrid Spectrometer. Monitoring System — M. Boratave, E. V. Vlasov, J. David, N. A. Datsko, Yu. M. Ivanyushenkov, É. P. Kistenoev, N. G. Minaev, B. F. Polyakov, M. M. Soldatov, and A. G. Kholodenko.	549	46
Apparatus for Measuring Angular Gamma-Gamma Correlations in Specimens with Temperatures of 1.5-300°K — M. Budzyncky, J. Venřek, J. Koníček, T. Lesner, I. Ota, M. Petrik, I. Proohazka, O. Soucek, M. Finger, V. I. Fominykh, V. M. Tsupko-Sitnikov, P. Šimíček, A. Janeh, and Z. Yanout.	552	49
Anomalous Deviations of the Centers of Gravity of Time Distributions of Gamma-Gamma Coincidences with Measurement by Semiconductor Detectors — V. A. Morozov, V. I. Stegailov, G. Lizurej, N. I. Zhuravlev, A. Misiak, F. Pražak, I. Adam, I. Gradec, and A. K. Churakov.	555	52
Selective Fast-Neutron Spectrometry — E. A. Andreev, V. K. Basenko, S. A. Pshenichnyi, S. P. Sit'ko, and V. A. Stepanenko	559	55
Radial Position-Sensitive Semiconductor Detector — B. Amov, A. Dzhakov, B. P. Osipenko, E. Pentsya, and V. G. Sandukovskii. . .	561	57
Particle Detector with Three Microchannel Wafers — I. V. Gribov, S. V. Gubin, E. V. Lazutin, N. M. Persiantseva, and A. V. Shumakov.	564	59
Determination of Conversion Nonlinearity for X-Ray Detectors — A. G. Tur'yanskii and O. P. Fedoseeva	567	62
Convergence of Thermoluminescence Detectors — V. V. Ryzhukhinskii and A. D. Sokolov	569	64
Recording of Cerenkov Radiation by a Wire Chamber Operating in the Self-Quenched Streamer Mode — A. F. Buzulutskov, V. G. Vasil'chenko, V. Yu. Vashchenko, V. K. Myalitsin, A. I. Ronzhin, and L. K. Turchanovich	573	68

Engl./Russ.

14-Channel Threshold Gas Cerenkov Counter – M. N. Voichishin, B. N. Gus'kov, E. G. Devitsin, M. V. Zavertyaev, A. I. Zinchenko, M. N. Kapishin, V. A. Kozlov, V. V. Pavlovskaya, V. D. Cholakov, and E. A. Chudakov. 577 71
Energy Resolution of Cerenkov and Scintillation Shower Spectrometers for High-Energy Particles – V. V. Samedov 580 74
Recording Efficiency of NaI(Tl) Crystals for γ Radiation of Hollow Cylindrical Sources – R. Yu. Yasyulenis 584 78
Spectrometric Characteristics of Cadmium Sulfide-Based Scintillators – Yu. G. Zdesenko, A. S. Nikolaiko, V. D. Ryzhikov, and V. I. Silin 587 80
Use of Electric Field to Increase Nuclear Emulsion Sensitivity – A. Ya. Didenko, B. D. Lemeshkov, and I. N. Moroz. 590 83
Device for Continuous Measurement of ^{3}H and ^{14}C Concentrations in Solutions – Yu. I. Grishin, A. M. Lyutsko, and V. A. Sasunkevich 592 84
Multilayer Detector for Measuring Absorbed Dose in Skin – D. P. Osanov, V. P. Panova, and A. I. Shaks 594 86

EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY

M-222-Computer-Based Aerodynamic-Data Acquisition and Processing System – V. A. Zakharchuk, A. A. Zori, E. O. Savkova, A. V. Ryndin, and N. A. Yaroshenko. 598 90
Optimum Smoothing of Data Plus Noise Using Fast Fourier Transform – E. L. Kosarev and E. Pantos 600 92
Data Transfer from BÉSM-4 to ES Computer – O. B. Tarutin 603 95
Memory Dispatcher for Élektronika-60M Microcomputer – A. Yu. Chernyak. . 606 98
Computer Plotter-Reader – V. V. Evseev and Ya. M. Mukovskii. 608 99

ELECTRONICS AND RADIO ENGINEERING

Eight-Channel Integral Discriminator for Recording Proportional-Counter Signals – V. G. Brovchenko, A. M. Kirichenko, and M. M. Tsygankov.. 611 102
High-Speed Differential Pulse Discriminator-Counter – K. D. Shelevoi . . 614 105
Time-Scale Converter – I. V. Peretyagin and A. N. Tsybul'nik 616 107
Power-Saving Single-Time-Interval Generators – V. P. Bakalinskii, V. D. Bichukov, I. G. Semenenko, and A. G. Khlon' 618 109

Volume 28, Number 3, Part 2 May-June, 1985

ELECTRONICS AND RADIO ENGINEERING

Television-Line Selector – V. I. Venglyuk. 621 112
Precision Voltage-to-Current Converter – A. N. Ermolaev and V. G. Gusev 623 113
Arkad'ev–Marx Generator with Capacitive Coupling – M. V. Shkaruba, A. B. Gerasimov, and M. S. Khorunzhii 625 115
High-Voltage Thyristor Commutator with Optoelectronic Control – S. Ya. Verkhovskii and V. P. Egorov 628 118
High-Power Precision Pulse Modulator with Variometer Artificial Line – M. A. Gladkikh, A. M. Dolgov, V. P. Krivchikov, G. M. Kuperman, and A. D. Pliss 630 119
Nanosecond-Pulse Shaping Using Microwave Power Transistors and Lewis Transformer – A. S. Kashintsev and O. S. Kolotov. 633 121
S-Diode Nanosecond Pulse Generator for Modulation of Semiconductor Generators – Yu. V. Vvedenskii, A. B. Zuev, D. D.Karimbaev, G. L. Prikhod'ko, and A. A. Khrustalev. 635 123
Generator of Pseudorandom Binary Sequences – V. A. Sorokin, I. T. Rozhkov, S. A. Titov, and A. N. Filippov. 638 125
Programmable Function Generator for Studying Nonlinear Two-Terminal Networks – L. I. Ukhanov. 641 128
Wideband Low-Noise Amplifier for 0.7-2 GHz – I. Angelov, I. Stoev, and L. Urshev 643 129
Spectrometer Amplifier – Yu. K. Akimov, Din Shi Huen, and A. I. Kalinin 645 131
Discriminator Based on Voltage Comparator for Nuclear Physics Research – V. A. Vorob'ev, A. A. Kiselev, and R. N. Kuz'min . . . 648 134

	Engl.	Russ.
Switching Full-Wave Synchronous Detector — A. A. Pimonov and Yu. I. Solovetskii	650	136
Amplitude-Stable Quadrature Phase Shifter for Frequencies of 20 Hz to 200 kHz — S. P. Novitskii, V. I. Kenzin, I. I. Burenkov, O. A. Yur'ev, and R. I. Burenkova	652	137
Apparatus for Microwave Study of Dielectric Properties of Ferroelectrics at Low Temperatures and with Uniaxial Compression — G. V. Belokopytov, I. V. Ivanov, N. E. Lebedev, and A. A. Kharin	654	139
GENERAL EXPERIMENTAL TECHNIQUES		
Generator of Molecular Gas Beams — R. F. Gazizov, Yu. A. Gel'man, Yu. M. Dymshits, and A. A. Chernov	657	142
Ion Source for Studying Ion Distribution with Respect to Initial Kinetic Energy — G. D. Tantsyrev and Yu. F. Baranov	659	143
Pulsed Carbon-Plasma Source for Production Processes — A. I. Maslov, G. K. Dmitriev, and Yu. D. Chistyakov	662	146
Apparatus for Study of Electron–Photon Emission of Solids — V. A. Kritskii, M. P. Klyap, and S. S. Pop	666	149
Automatic Bench for Study and Selection of Single-Electron Photomultipliers — A. A. Venikov and K. D. Shelevoi	669	152
Radiometric Apparatus for Optical Studies under Ballistic-Path Conditions — E. P. Andreev, N. N. Baulin, A. M. Biryukov, V. L. Grenkov, A. M. Daushvili, D. S. Ermakov, D. G. Kuvalkin, V. A. Lyutomskii, I. N. Orlova, N. N. Pilyugin, Yu. M. Sagaidachnyi, O. K. Taganov, and A. S. Trufanov	672	155
Quasistationary Neodymium-Glass Laser Generation with Negative Feedback — S. A. Babin and V. G. Gladyshev	676	158
Stabilization of Pulse Delay of YAG:Nd^{3+} Laser — S. S. Sarkisyan, G. M. Gusakov, and A. A. Komarnitskii	678	160
Pump-Lamp Firing-Pulse Generator for Solid-State Lasers — Yu. S. Denishchik	680	161
Three-Component Superconductor Magnetometer — V. A. Lisitsyn, S. V. Motorin, B. M. Rogachevskii, and G. A. Syretskii	683	165
Automated Magnetometer with Superconducting Solenoid — A. D. Balaev, Yu. V. Boyarshinov, M. M. Karpenko, and B. P. Khrustalev	685	167
Measurement of $(\partial T/\partial P)_S$ for Solids and Liquids under Pressure to 3 GPa — L. N. Dzhavadov and Yu. I. Krotov	687	168
Contactless Method for Recording Photoconductivity Spectra of Semiconductors — B. A. Andreev, L. I. Gershtein, V. B. Ikonnikov, and V. B. Shmagin	691	172
Recording of Derivative of Scanning-Probe Signal — Z. N. Adamyan, M. G. Azaryan, V. M. Arutyunyan, and D. K. Parsamyan	694	174
Metal-and-Glass Low-Voltage Electron Diffractometer — S. A. Knyazev and Yu. B. Vymorkov	697	176
Method for Measuring Temperature of Surface Irradiated by Electron Beam — A. B. Ormont	699	178
Wire Chamber for Recording Ultraviolet and X Radiation with Resolution of $\sim 50 \times 80\,\mu m$ — V. D. Peskov	702	181
Proportional Detector for Energy Analysis of Photoelectrons with X-Ray Diffraction — É. Kh. Mukhamedzhanov and Le Kong Kui	704	183
Nuclear-Demagnetization Cryostat and Cryostat for Dissolving ^3He in ^4He with High Cooling Performance — A. S. Borovik-Romanov, Yu. M. Bun'ko, V. V. Dmitriev, Yu. M. Mukharskii, and G. K. Tvalishvili	707	185
Displacement Meter for Laboratory Studies at Cryogenic Temperatures — V. I. Kabanov and V. V. Plotnikov	715	192
LABORATORY TECHNIQUES		
Noise-Immune Oscilloscope Synchronizer — A. M. Sitdikov and A. M. Lur'e.	717	194
Spectrum-Discretizing Sensor for Specord-75IR Spectrophotometer — A. M. Rzhevskii, D. K. Buslov, A. V. Il'yushonok, and N. I. Makarevich	718	195
Goniometer-Rotation-Angle Recorder — A. V. Shchagin	721	197
Signal Converter for Nuclear-Magnetic Flow Meter — A. E. Pryakhin and A. E. Faibyshev	723	200

	Engl.	Russ.
Absorption Chamber for Akali-Helium Magnetometer — E. V. Blinov, S. P. Dmitriev, and P. P. Kuleshov.	725	201
Device for Heating Specimens in RÉM-200 Scanning Electron Microscope — I. S. Stoletov, I. A. Korzh, and V. S. Kovivchak.	726	202
Field-Emission Cathodes for CWIKSCAN Scanning Electron Microscopes — R. M. Khatapova, V. Kh. Romanova, L. L. Demskaya, and V. A. Gushchin.	727	203
Technology for Produing Carbon Field Emitters — R. M. Khatapova, L. L. Demskaya, and V. Kh. Romanova.	729	205
Thermoelectric Cooler Based on TÉMO-6 and TÉB-023 Modules — L. B. Masleev and V. N. Nedashkovskii.	732	207
Precision Temperature Regulator — F. K. Skarzhinyuk	733	208
Optical Cryostat with Cooled Modulator — I. N. Syrgavbekov, V. V. Bunegin, and I. A. Karapatnitskii.	736	211

Volume 28, Number 4, Part 1 July-August, 1985

Multibus-II Standard and Prospects for Its Use in Experiment Automation (Survey) — S. G. Basiladze.	739	7
NUCLEAR EXPERIMENTAL TECHNIQUES		
Diagnosis of Multiple Passage through a Thin Internal Target in a Cyclotron — I. Ya. Barit, L. N. Katsaurov, L. P. Nechaeva, and Yu. K. Khokhlov	761	28
Modulation of a Beam of Ultracold Neutrons by a Thin-Film Ferromagnetic Shutter — M. I. Novopol'tsev, Yu. N. Pokotilovskii, and I. G. Shelkova	764	31
Light-Nucleus Spectrometer Based on Multidetector Telescopes — L. I. Abashidze, V. V. Avdeichikov, S. A. Avramenko, V. I. Bogatin, V. A. Budilov, N. L. Gorshkova, J. Zlomanczuk, N. K. Zhidkov, V. D. Maisyukov, Yu. A. Murin, A. Nawrot, V. A. Nikitin, P. V. Nomokonov, V. S. Oplavin, and M. Szawlowskii	767	33
Gamma Spectrometer with 800-cm^2 Sensitive Area for Space-Physics Research — F. A. Agaronyan, A. G. Akhperdzhanyan, G. A. Vartapetyan, P. I. Galumyan, A. S. Glyanenko, Yu. M. Karpov, A. V.Kurochkin, L. A. Pogosyan, and V. T. Samoilenko	772	38
Scintillation Gamma Spectrometer for Determining Arrival Direction of Cosmic Gamma Quanta — O. I. Savun, S. A. Belyakov, and O. V. Kislyakov	774	39
Electroluminescence Emission Chamber with Condensed Xenon as Working Material — A. I. Bolozdynya, V. V. Egorov, S. D. Kalashnikov, V. L. Krivoshein, V. P. Miroshnichenko, and B. U. Rodionov	778	43
High-Efficiency Semiconductor Thermal-Neutron Detector — S. A. Azimov, F. G. Mullagalieva, N. M. Sheina, and A. Ya. Yafasov	782	46
EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY		
Processing Mössbauer Spectra with an EMG-666 Microcomputer and an NTA-1024 Multichannel Analyzer — D. S. Zakhar'in, F. Kh. Chibirova, and S. I. Reiman	785	49
Spectrometer Module on Line with Élektronika D3-28 Microcomputer — V. G. Vlasov and A. I. Frolov	787	51
Astrophotometer–Microcomputer Communication Unit — S. A. Zolotoi and S. V. Kholondyrev.	790	54
CAMAC-Compatible 16-Channel Counter Module — E. N. Vladimirov, M. L. Grinfel'd, N. E. Orlova, and A. Z. Pliss.	793	56
CAMAC-Compatible Nanosecond Pulse Shaper — B. F. Kirillov, A. I. Klimov, and E. A. Meleshko	796	58
Cassette-Recorder Acquisition of Monitored-Process Data — A. Ya. Ksenzenko and Yu. V. Chugunov.	798	61
Buffer Storage Unit for Multivariate Data Analysis — V. A. Kisurin and F. N. Berezin	804	66
Digital Correlator for Operation with Élektronika-60 Computer — V. A. Deshabo and Yu. F. Kiyachenko	807	69

Engl./Russ.

Oscilloscope Interface for SM-4 Computer — V. F. Salokhin and S. V. Sedakov 810 72
Eprom-Programmer Interface Module for ISKRA-1256 Microcomputer — A. V. Salabai 812 74
N-306 Plotter in Conjunction with SM-1 Control Computer Complex — N. P. Barabanov, M. R. Zavadskii, B. P. Sabanin, and G. M. Trubacheev. 815 76

ELECTRONICS AND RADIO ENGINEERING
Automatic System for Holding Pinch in Equilibrium Position in Tokamak — I. M. Averin-Lavrov, E. I. Gusevskaya, and S. M. Naftulin. 818 79
Electronic Circuit of Peak Detector Based on Drift Chambers — S. G. Bobkov, V. A. Kantserov, V. V. Sosnovtsev, and V. K. Chernyatin. 822 82
Pulse Amplitude and Duration Selector — S. V. Smirnov and E. A. Kolombet. 826 86
Sample-and-Hold Circuit with Enhanced Linearity — V. S. Plekhanov, V. M. Sidorov, and V. G. Shakhtshneider 828 88
Switches with Low Leakage Currents for Multichannel Commutator — V. G. Brovchenko and V. V. Shafirkin. 830 89
High-Speed Linear Switch with Increased Load Capacity — V. F. Grigor'ev, V. V. Danilevich, and V. G. Kvachenok. . . . 834 93
Intensifier-Pulse Generator for Cathode-Ray Storage Tubes — G. L. Vareshkin, G. P. Veshnyakov, Yu. A. Golovastikov, and S. G. Rabinovich. 836 95
Snop-2 Megaampere Current-Pulse Generator — A. S. El'chaninov, F. Ya. Zagulov, B. M. Koval'chuk, N. F. Kovsharov, V. A. Lavrinovich, A. V. Luchinskii, G. A. Mesyats, Yu. F. Potalitsyn, S. A. Sorokin, and V. F. Fedushchak. 838 97
High-Power High-Voltage Pulse Generator — S. Ya. Verkhovskii, A. V. Lyulyaev, and F. A. Flat. 841 100
Pulsed Power Supply for Semiconductor Laser Array Using MOS Power Switching Transistors — V. P. D'yakonov and V. Yu. Smerdov. . . 843 102
Transformer Inductive Storage Unit for Generating High-Voltage Pulses with Flat Tops — I. N. Grigor'ev, E. I. Lapshin, E. A. Polyakov, and Z. T. Tenieshvili 845 104
500-kV Capacitive Divider in Inductor with Water Insulation — A. I. Gerasimov, A. P. Gridasov, and Yu. G. Kataev. 849 107
Pulse Power Amplifier with Enhanced Dynamic Response — V. V. Mosyagin and Yu. P. Tkachenko 852 110
Nonlinear Transistor Amplifier for Shaping Nanosecond Magnetizing Pulses — A. S. Kashintsev and O. S. Kolotov 854 111
Shaper Amplifier with Symmetric Feedback for Drift Chambers — A. A. Omel'yanenko, M. N. Omel'yanenko, and L. S. Barabash. . 857 114
Wideband Power Amplifier with High Controllable Linearity — B. I. Vlasov, V. Yu. Kustov, and A. N. Chaikovskii. 859 116
High-Speed dc Amplifier with Digitally Programmable Gain — N. V. Dmitriev. 860 117

Volume 28, Number 4, Part 2 July-August, 1985

Device for Measuring Distribution Function of Random Processes — Dzh. K. Parsamyan and B. E. Sobotkovskii..... 863 119
Reference-Function Generator for Measuring Time Intervals of Random Processes — L. G. Goverdovskaya and A. G. Strochilo..... 864 120
Transfer-Capacitance Meter for Field-Effect Transistors — V. P. Parusov, V. N. Komarov, and V. N. Rep'ev..... 867 122
High-Value Low-Noise Resistors for Spectrometers with Cooled Semiconductor Detectors — S. A. Baldin, Ch. Zhargal, G. N. Zorin, T. Laskus, B. P. Osipenko, A. V. Revenko, and T. I. Ryakhovskaya..... 870 125

	Engl./Russ.
Modulated Meter for Strength of Weak Quasistatic Electric Fields — R. F. Musin, V. A. Morozov, and A. N. Matlashov.....	872 127
Low-Frequency Phase-Sensitive Rectifier — I. M. Fedorov.....	874 129
Precision Logarithmic Current Converter — A. V. Churbakov.....	877 131
Functional Analog–Digital Converter — V. Ya. Groshev.....	879 133
Autodyne NMR Sensor with Phase Automatic Frequency Control — G. E. Kibrik and V. V. Razumov.....	882 135
Automation of Electron Spin-Lattice Relaxation-Time Measurements — V. N. Dudkov and V. I. Muromtsev.....	885 138
Apparatus for Measuring Parameters of Dielectrics in Microwave Region at Temperatures to 2300°K — S. M. Brekhovskikh, V. V. Dem'yanov, E. B. Zal'tsman, A. V. Litovchenko, and G. A. Smirnov.....	888 141
Data Display for Apparatus with Built-In Monitor — V. S. Govorov and A. F. Mironov.....	892 144
Television Display for Electrical Signals — I. V. Peretyagin and A. N. Tsybul'nik.....	896 147
Computer-Controlled Regulated High-Voltage Supply — A. A. Nakhan'kov, A. Yu. Nesterov, O. A. Pavlovich, I. V. Reznikov, E. D. Tverdokhlebov, and A. V. Sholukh.....	898 150
Regulated Supply with Variable Output Voltage of 300 V to 20 kV — V. K. Belyaev, V. N. Poduyazhnikov, and V. K. Chevokin.....	900 152
High-Voltage Supply for Backward-Wave Tubes — A. Ch. Belyachits, P. D. Kukharchik, and V. G. Semenchik.....	903 154
Optoelectronic-Thyristor Regulated DC Supply — B. G. Kozlov.....	905 155
GENERAL EXPERIMENTAL TECHNIQUES	
Cold-Cathode Gas-Discharge Ion Source — B. I. Zhuravlev, V. A. Nikitinskii, and A. T. Gaponenko.....	907 157
Effect of Discharge-Chamber Temperature on Yield of Multiply Charged Metal Ions from Arc Source with Cathode Sputtering of Working Material — M. Yu. Bredikhin and B. P. Il'enko.....	909 159
Apparatus for Auger Spectroscopy with Layered Sputtering — V. A. Pirogov, A. V. Kozhevnikov, and V. I. Kravtsov.....	911 160
Fast-Scan Fourier Spectrometer for Diagnosis of High-Temperature Plasma — D. K. Akulina, V. B. Lazarev, V. I. Lapshin, V. N. Leonov, S. I. Fedorenko, and O. I. Fedyanin.....	914 163
Modification of Input Electron-Optical System of ÉS-2401 Photoelectron Spectrometer — L. N. Grigorov.....	917 166
Compact Time-of-Flight Mass Spectrometer — A. S. Belov, S. A. Kubalov, V. E. Kuzik, and V. P. Yakushev.....	919 168
Measurement of Total Negative-Ion Current with MI1201 Mass Spectrometer — V. A. Mazunov, M. V. Muftakhov, and V. I. Khvostenko.....	922 170
Spectrometer for Study of Photoconductivity of Semiconductor in Far Infrared Region Based on IKS-31 — B. A. Andreev, A. V. Ivashin, T. M. Lifshits, G. A. Maksimov, and V. B. Shmagin.....	925 173
Device for High-Speed Kinetic Infrared Spectroscopy — Yu. V. Chugunov, A. A. Karelov, and A. V. Chugunov.....	927 175
Apparatus for Study of Diffuse-Reflection and Luminescence Spectra of Solids in Vacuum — L. G. Kositsyn, M. M. Mikhailov, N. Ya. Kuznetsov, and M. I. Dvoretskii.....	929 176
Apparatus for Monitoring Optical Homogeneity of Transparent Materials and Scattering Defects Based on Molecular-Scattering Spectrometer — A. D. Levin, R. K. Leonov, and I. S. Efimochkin.....	933 180
System for Recording Bivariate Intensity Distribution of Optical Radiation — R. R. Vil'danov, D. A. Gladyshev, I. A. Deryugin, and A. T. Mirzaev.....	936 183

Engl./Russ.

Optical System for Shadow Diagnostics of Phase Objects with Self-Emission — I. Ya. Korolev, T. P. Kosoburd, and Yu. M. Sorokin..... 939 186
Improved Voltage Divider for FEU-63 — I. A. Radkevich, F. D. Ratnikov, and N. G. Tkach..... 941 188
Film Converters of Ultraviolet Radiation — O. P. Gavrishchuk and V. K. Semenov..... 944 190
Efficient High-Frequency Loss Modulator in Laser with Active Mode Synchronization — I. P. Angelov, G. V. Venkin, D. V. Kazantsev, and G. M. Mikheev..... 947 192
Quantum Magnetometer for Measuring Magnetic Susceptibility Over Wide Ranges of Temperatures and Fields — V. D. Kuznetsov..... 952 196
Automatic Elastic-Relaxation Spectrometer — V. V. Koshtoev, Z. Sh. Mandzhavidze, M. V. Magradze, V. A. Melik-Shakhnazarov, and G. G. Sekhniaidze..... 958 201
Apparatus for Measuring Dielectric Parameters by Pulse and Fluctuation Methods — V. A. Goncharov..... 960 203
Compensated Cathode-Ray Curve Tracer — A. K. Babak and A. G. Isaev..... 963 206
Rejecting Diffractometer with Linear Coordinate Detector for Single Crystals — O. I. Ageev, L. P. Glazova, D. A. Goganov, B. V. Kazanskii, and B. M. Reizis..... 965 208
Multisection Gas Counters for Spectral Studies of Weak Pulse X-Radiation — G. D. Bogomolov, N. A. Kravchenko, V. D. Peskov, and E. R. Podolyak..... 968 211
Low-Temperature High-Pressure Optical Chamber — M. F. Shchanov, K. P. Meletov, and V. A. Petrovskii..... 974 216

LABORATORY TECHNIQUES

Du5 Vacuum Gate with Copper Seal — V. I. Smirnov and P. V. Belov..... 977 218
Compact Heatable Gas-Flow Regulator — Yu. I. Asalkhanov and D. D. Dondokov..... 979 220
Tensometric Differential Manometer — I. N. Polandov, A. I. Savinkov, N. P. Kachalov, and L. N. Syrkin..... 980 221
Spectrophotometer Cell for Studying Fermentation Reactions under High Hydrostatic Pressure — V. A. Drachev, V. Ya. Chernyak, and D. P. Sukhoi..... 982 222
Apparatus for Studying Polarization Reversal of Ferroelectrics with Charge Control — V. I. Gurtovoi, S. G. Gakh, and V. Z. Borodin..... 984 224
Variable Regulator of Manostat Temperature — D. D. Prokof'ev..... 985 225

Volume 28, Number 5, Part 1 September-October, 1985

Magnetic Mirror Trap with Electron-Cyclotron Plasma Heating as a Source of Multiply Charged Ions (Review) — K. S. Golovanivskii 989 7

NUCLEAR EXPERIMENTAL TECHNIQUES

Subnanosecond High-Current Electron Accelerator — K. A. Zheltov and A. N. Petrenko 1012 27
Accelerating Tube of Pulse Electron Accelerator — V. T. Astrelin, V. S. Nikolaev, A. V. Smirnov, and M. A. Shcheglov 1015 30
Zenit-100 Low-Background Apparatus for Measuring Space Distribution of Beta Activity — S. P. Avdeev, V. A. Karnaukhov, V. D. Kuznetsov, G. V. Myshinskii, V. V. Popov, and L. A. Petrov 1017 32
Hyperon Spectrometer — V. A. Antyukhov, G. S. Bitsadze, Yu. A. Budagov, Yu. G. Budyashov, V. B. Vinogradov, A. V. Volod'ko, V. M. Grebenyuk, V. P. Dzhelepov, S. V. Erin, N. I. Zhuravlev, V. G. Zinov, V. M. Korolev, Yu. F. Lomakin, V. G. Odintsov, N. A. Rusakovich, A. A. Semenov, S. V. Sergeev, V. T. Sidorov, A. N. Sinaev, A. A. Feshchenko, V. B. Flyagin, I. E. Chirikov-Zorin, I. N. Churin, Yu. N. Kharzheev, S. A. Akimenko, V. I. Belousov, A. M. Blik, Yu. B. Bushnin, A. F. Dunaitsev, S. A. Zelepukin, Yu. D. Karpekov, V. N. Kolosov,

V. M. Kut'in, A. P. Lomov, G. P. Makarov, Yu. M. Mel'nik, A. I. Pavlinov, V. S. Petrov, V. A. Sen'ko, V. A. Sergeev, Yu. N. Simonov, A. S. Solov'ev, A. E. Churakov, A. E. Yakutin, O. B. Abdinov, V. M. Maniev, V. Glinka, J. Pišut, N. Pišutova, P. Povinec, B. Sitar, P. Strmeň, M. Hudy, V. Černy, R. Janik, N. V. Maksimenko, J. Antoš, M. Seman, L. Šandor, I. Špalek, K. Rybicki, M. Turala, L. Hajduk, W. Janczur, A. A. Bogush, Yu. A. Kul'chitskii, A. S. Kurilin, L. G. Moroz, M. N. Omel'yanenko, A. M. Artykov, Ts. Bonchev, A. Iordanov, R. Tsenov, N. S. Amaglobeli, I. A. Minashvili, and R. G. Salukvadze 1021 35

High-Speed Automated Proton Spectrometer — P. A. Demchenko, N. P. Klimko, A. G. Koval', and V. N. Plotnikov 1031 42

Liquid-Xenon Scintillation Gamma Spectrometer — I. R. Barabanov, V. N. Gavrin, and A. M. Pshukov 1034 45

Amplitude Distribution of Output Signals of Cerenkov and Scintillation Shower Spectrometers — V. V. Samedov 1037 47

Multichannel Threshold Gas Cerenkov Counter — B. N. Gus'kov, E. G. Devitsin, M. V. Zavertyaev, A. I. Zinchenko, M. N. Kapishin, V. A. Kozlov, A. L. Lyubimov, V. V. Pavlovskaya, V. D. Cholakov, and E. A. Chudakov 1039 49

Organization of Inspection of Bubble-Chamber Photographs — I. A. Gritsaenko, L. P. Petrovykh, Yu. L. Petrovykh, and A. B. Fenyuk 1043 53

Precision Determination of Charge Losses in Semiconductor Detectors with Variable Capacitance — A. V. Vasil'ev, E. M. Verbitskaya, V. K. Eremin, and N. B. Strokan 1047 56

Instrument for Recording Alpha Radiation — É. B. Ershov and Yu. A. Ivanov 1051 59

Discharge Quencher for Geiger Counters — R. K. Mushev 1054 61

Determination of Hydrogen-Isotope Distribution in Materials Using 14.5-MeV Neutrons — B. G. Skorodumov 1056 63

EXPERIMENTAL APPLICATION OF COMPUTER TECHNOLOGY

Multivariate Analyzer Based on SM-3 Computer and CAMAC Hardware — R. Kupczak, A. Soltan, N. K. Skobelev, M. Lewitowić, A. Jankowski, and G. Baluka 1061 67

General-Purpose Microprocessor-Based CAMAC-Compatible Control and Processing Module — E. G. Romanov, N. V. Chayanov, and E. O. Yanenko 1065 71

System of Nanosecond-Logic Modules — S. G. Basiladze, A. N. Smirnov, A. N. Stepanov, and V. M. Rybnikov 1068 73

Interfacing a KR580IK80A Microprocessor with the IEC Bus — L. A. Chugunov and A. O. Mednis 1073 78

Interface for Peripherals of D3-28 Computer with Elektronika-60 Computer — A. V. Ermakov, and D. V. Togatov 1076 81

Computer Output to RDD-1 Plotter — S. D. Solnushkin and V. N. Chikhman . . . 1078 83

ELECTRONICS AND RADIO ENGINEERING

High-Speed Analog–Digital Converter with 60-dB Dynamic Range — V. P. Doroshev, A. M. Belov, and V. E. Yamnyi 1082 86

High-Speed Bitwise-Balancing Voltage-to-Code Converter with Statistical Averaging of Differential Scale Nonuniformity — V. V. Valakh and V. V. Danilevich 1086 90

Digital Sine-Wave Generator — V. M. Sapel'nikov, V. V. Tarasov, A. M. Muftakhov, and A. D. Maksutov 1089 93

Code Generator for Controlling High-Voltage Pulse Devices — S. V. Ashcheulov, N. V. Egorov, and K. O. Kallistov 1091 95

Multipurpose Programmable Pulse Generator — V. V. Sorochinskii 1093 96

High-Voltage Frequency-Pulse Generator with Inductive Energy Storage — I. M. Gavrilov, I. N. Grigor'ev, and É. S. Ermolovich 1095 99

Multichannel High-Voltage Nanosecond Pulse Generator — N. K. Kapishnikov . . 1099 102

Parallel Connection of High-Voltage Voltage-Pulse and Current-Pulse Generators — L. A. Gel'fond and B. V. Semkin 1101 104

High-Power Nanosecond Pulse Shaper — V. V. Bachurin, V. P. D'yakonov, and V. Yu. Smerdov 1103 106

Pulse Charging Device — L. D. Butakov, V. A. Vizir', V. K. Dubich, N. A. Lashuk, N. G. Shubkin, and V. P. Shcherbinin 1105 107

	Engl.	Russ.
Capacitive Storage Device for Strobotron Supply — V. G. Oshlakov and N. V. Bybyakin	1108	110
Pulse Amplifier Implemented by GaAs Field-Effect Power Transistors with Subnanosecond Settling Time — V. P. D'yakonov, P. G. Adamov, and A. E. Shlyakhtin	1110	112
Shaper-Amplifiers Implemented by GaAs Schottky-Barrier Field-Effect Power Transistors — P. G. Adamov and V. Yu. Smerdov	1112	113

Volume 28, Number 5, Part 2 September-October, 1985

	Engl.	Russ.
Amplifier for Measuring Profile of Slowly Extracted Proton Beam — A. S. Dyshkant, V. A. Krendelev, and V. Ya. Uglekov.	1115	115
Differential Amplifier with 100-MHz Bandwidth — A. I. Ivanov.	1118	117
Noise-Immune Pulse-Order Monitor with <40-psec Resolution — Yu. G. Kataev	1119	118
Wideband Converter of Charge of Particle Beam Incident on Faraday Cylinder to Pulse Number — A. V. Shchagin and V. F. Lysenko.	1121	120
Integral-Correlation 1/f-Noise Meter — V. V. Matveev.	1123	122
Interface for Kh6-4 Correlation Meter and D3-28 Microcomputer — O. I. Karoblev, A. V. Stepanov, and I. V. Yaminskii.	1126	124
Precision Linear Detector — V. K. Raevskii and M. G. Davtyan.	1129	127
Digital Difference Integrator — V. D. Bunin, V. N. Brezgunov, and Yu. F. Sigaev.	1131	129
High-Voltage Supply for Backward-Wave Tube — A. N. Bryukhanov, P. M. Kosarev, S. T. Latushkin, and L. I. Yudin.	1133	131
Adaptive Audio-Frequency Filter — S. I. Andriyanov and A. G. Root	1138	135
Noise Compensation in High-Voltage Measurements — A. S. Boriskin and V. I. Zolotovskii.	1140	138
Pulsed Current Supply for IMPATT Diodes — V. I. Orlov, V. Yu. Smerdov, and Yu. V. Fomin	1142	139
GENERAL EXPERIMENTAL TECHNIQUES		
Arc Particle Source — A. F. Sorokin	1144	141
Subnanosecond Fast-Electron-Beam Generator — V. I. Matakov and V. A. Moskvichev	1146	143
Batcher for Powder Vaporized in VUP-4 Vacuum Station — A. P. Semenov and V. M. Khozonkhonova.	1148	145
Apparatus for Studying Adsorption Processes on Solid Surfaces by Ellipsometry and Mass Spectrometry — Yu. I. Asalkhanov, D. D. Dondokov, and I. T. Pron'kinov	1149	146
Thyristor Switch for Fast Photomultipliers — B. P. Aduev, V. I. Salomatin, and V. T. Shkatov	1153	149
Apparatus for Study of Double Refraction — A. I. Rukovishnikov and N. A. Morozov.	1154	151
Precision Photodetector with Frequency Output — A. S. Martynyuk and A. V. Sachkov.	1156	153
Use of High-Current Photocells to Control Laser-Pulse Shape — E. V. Nilov and V. A. Rusov.	1159	155
Measurement of Divergence of CO_2-Laser Radiation — A. A. Shepelenko and V. B. Shulyat'ev	1161	157
Holographic Apparatus for Study of Two-Phase Flows — V. P. Shorin, O. A. Zhuravlev, L. G. Logak, L. N. Medinskaya, and A. I. Fedosov.	1163	158
Pulse Magnetic-Induction Regulator — B. N. Vainman and A. P. Kuprin	1167	162
Apparatus for Superconductor Measurements in Alternating Magnetic Fields — S. N. Ermolov and V. A. Marchenko	1169	164
Apparatus for Measurement of Ultrasound Velocity in Liquid Metals at High Temperatures and Pressures — D. I. Arnol'd, A. M. Gordeenko, P. N. Ermilov, V. F. Kozhevnikov, and S. P. Naurzakov.	1173	167
X-Ray Spectrometer for Study of Inelastic Scattering — A. G. Lyubimov, V. A. Bushuev, and N. N. Lobanov	1177	171
Increased Sensitivity in Measurement of Curvature of Single Crystals by X-Ray Spectrometer — A. G. Noskov and E. M. Trukhanov	1180	173
Correction of Raster and Focusing Distortions in Cathode-Ray Tubes — O. L. Kulyas and A. P. Chernov	1182	175

	Engl.	Russ.
Deep-Level Capacitance Spectrometer — V. A. Samoilov and V. Ya. Prints. . .	1185	178
Measurement of Carrier-Concentration Distribution in Epitaxial Layers of $Pb_{1-x}Sn_xTe$ — O. A. Aleksandrova, M. I. Kamchatka, and M. S. Miropol'skii	1189	182
Determination of Electric-Field Potential in Solid Dielectrics — S. G. Boev	1192	184
Calorimeter with Dismountable Seal for Low-Temperature Research — V. N. Naumov and V. V. Nogteva	1194	186
LABORATORY TECHNIQUES		
Electron Gun for Surface Treatment of Materials — S. A. Korenev, N. I. Balalykin, I. B. Enchevich, and M. K. Mikhov	1200	190
Thermocouple Vacuum Gauge — K. V. Kiryunikov.	1203	192
Magnetron Sputterer — R. Z. Bakhtizin, E. K. Ratnikova, and V. P. Petrakov.	1204	194
Compact Observation-Window Protective Device for Vacuum Systems — M. I. Dmitruk.	1206	195
Production of ^{14}C Films from $^{14}CH_4$ — A. S. Dem'yanova, B. G. Novatskii, A. G. Obraztsov, V. A. Semochkin, A. N. Sidorenko, V. V. Sukharevskii, and I. K. Shvetsov	1207	196
Sampling Attachment to Oscilloscope for Plotter Output — V. B. Arkhangel'skii, S. F. Glagolev, V. A. Panov, and M. M. Chervinskii.	1209	198
Increasing the Resolution of Photoelectric Angle-to-Code Converters — L. P. Zakharov	1211	200
Twin-Flask Apparatus with Observation Ports for Study of Dynamics of Diffusion Processes in Gases at Elevated Pressures — Yu. I. Zhavrin, S. B. Tarasov, A. Z. Aitkozhaev, S. M. Belov, and I. V. Bolotov.	1214	203
Multiconductor Lead-In for High-Pressure Chamber — S. V. Cherepov and V. A. Chernenko.	1216	205
Circulating Cryostat for Diffractometer for Structure Research at Temperature of 4.2-300°K — A. S. Bulatov and V. F. Dolzhenko. . . .	1218	206
Quartz-Crystal Thermometer — O. Ya. Shmelev and V. I. Prokop'ev	1220	209
Metal Holder for High-Temperature Measurements of Thermal Emf and Electrical Resistance — A. T. Burkov and V. G. Dvunitkin	1222	210
Commutator-Motor Speed Regulator — O. A. Belov and N. I. Krasil'nikov . . .	1224	212
Independent Power Supply for Electric-Discharge Magnetic Pump — I. V. Bondaletova, I. N. Grigor'ev, and V. N. Zhuravlev.	1225	213
Optimization of Photographic Recording of Interference Patterns — M. F. Noskov	1226	214
Attachment to Élektronika OT-6 Optical Tester for Measurement of Losses in Optical Fibers That Are Not in Connectors — M. A. Maryukov, A. I. Zubkov, and E. A. Ivanova.	1229	216
Apparatus for Study of Defect Centers in Semiconductors — I. B. Puzin and V. G. Evsyukov	1230	217
Temperature Regulator for Electron-Projector Cathode — N. V. Parol', L. S. Rozinskii, A. G. Savchenkov, and G. A. Semanova.	1234	220
Thermoelectric Attachment to UT-15 Thermostat to Obtain Temperatures Below 0°C — N. P. Posnov and A. E. Demenev	1235	221

Volume 28, Number 6, Part 1 November-December, 1985

Programmable Calculators(Review) — V. P. D'yakonov.	1239	5
NUCLEAR EXPERIMENTAL TECHNIQUES		
Linear Induction Accelerator — V. V. Vasil'ev, G. G. Kanaev, É. G. Furman . . .	1253	19
Control of Radio-Frequency Characteristics of Linear Electron Accelerator — A. N. Filatov and V. K. Shilov	1258	23
Source of Multiply Charged Ions with Combined Magnetic Field — L. V. Agarkova, A. N. Kupriyanov, S. I. Meleshkov, L. B. Pletnikov, V. N. Reshetnikov, and B. I. Rudyak.	1261	27
Stable Positron-Lifetime Spectrometer — I. A. Repin, S. V. Svirida, and A. N. Semenikhin	1263	28

Panoramic Eight-Channel Magnetic Electron-Energy Analyzer with Circular Poles — I. N. Volkov, V. I. Mikhailov, G. L. Gromov, and I. N. Slivkov 1266 32
Nuclear Gamma Resonance Spectrometer for Small Specimens — S. M. Cheremisin, A. Yu. Dudkin, and I. V. Matveev 1270 35
Nuclear Gamma Resonance Spectroscopy of Thin Surface Layers — V. L. Gurachevskii, M. Mashlan, O. V. Misevich, A. L. Kholmetskii, and V. A. Chudakov 1274 38
Neutron Spectrometer with Pulse-Shape Gamma-Quantum Discrimination — S. N. Belyaev, A. B. Kozin, T. N. Mamedov, V. S. Roganov, V. A. Semenov, and A. A. Solnyshkin 1278 41
Fast-Neutron Scintillation Spectrometer with Gamma Compensation for Measuring Spectra and Fluxes of Neutrons with Energies of 0.5-16 MeV — V. M. Golovkov, V. N. Letov, I. A. Pavel'eva, and E. T. Protasevich. 1282 45
Spatial Resolution of Plastic Scintillation Converter — V. L. Gladchenko and V. V. Gorbunov 1285 47
Identification of Deuterons and Antideuterons in Separated Beams with a Liquid Cerenkov Counter — A. A. Ivanov, V. I. Kotov, B. V. Prosin, Yu. A. Samorodov, V. I. Solyanik, N. A. Chereshkov, Yu. N. Chernetskii, and S. A. Chernyi. 1288 50
Low-Pressure Multistage Cascade Chamber — Yu. V. Zanevskii, V. D. Peshekhonov, and L. P. Smykov. 1292 54
Preliminary Video-Signal Processing in Television Scanner — Yu. Ya. Karlyshev, O. F. Nemets, V. A. Grashilin, and V. A. Kisurin..... 1296 57
Determination of Maximum Possible Range of Detector Readings in Multidetector Apparatus — I. L. Guseva, V. K. Lyapidevskii, and L. B. Samoilova..... 1299 59

EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY

Gamma-Resonance System on Line With Microcomputer — E. V. Bil'dyukevich, V. L. Gurachevskii, Yu. A. Litvinovich, M. Mashlan, O. V. Misevich, A. L. Kholmetskii, and V. A. Chudakov..... 1303 62
Automated Study of Elementary Processes in Collisions of Electrons with Atoms and Ions — A. I. Dashchenko and V. I. Frontov..... 1305 64
System of Nanosecond-Potential-Logic Modules — S. G. Basiladze, A. E. Buklei, A. N. Larichev, and A. K. Leflat..... 1308 68
General-Purpose Logic System for Preselection of Events — V. I. Kotov, Yu. V. Mikhailov, P. M. Shagin, and A. V. Shchukin..... 1313 73
Interface for Automatic Recording and Playback of Experimental Data with ES9004 — A. N. Mikikechko..... 1319 78
Encoders in Laser Graphics-Data Read-Write Apparatus — A. A. Ivanov, A. F. Morozov, Yu. S. Nechaev, and T. G. Yakovleva..... 1322 80
Facsimile Output Device for ES Computer — L. T. Kunitsyna, A. A. Stoyanovskii, and L. P. Kharin..... 1325 83

ELECTRONICS AND RADIO ENGINEERING

Binary-To-Morse Code Converter — V. S. Govorov..... 1328 86
25-Channel Time-to-Digit Converter — O. V. Vedeneev, S. I. Matsenov, and R. I. Chernykh..... 1330 88
Correlometer Based on Pulse Analyzer — B. I. Soldatov and V. B. Rol'shchikov..... 1332 90
Synchronization Circuit for Shaping Picosecond Accelerated-Electron Pulses — Yu. S. Pavlov, N. G. Solov'ev, and A. P. Tomilov..... 1335 93
Random-Pulse Duration Discriminator — O. K. Kutsenko and V. A. Pogribnoi..... 1339 96

Avalanche-Transistor Bridge Scanning Circuit for Electron-Optical Camera with Picosecond Resolution — A. K. Gilev, M. I. Demchuk, S. M. Dmitriev, V. B. Lebedev, V. P. Mikhailov, and A. F. Chernyavskii 1341 98
High-Speed Push–Pull Amplifier Implemented by MOS Power Transistors — K. N. Stroev and O. A. Frolkov 1343 100
Operational Amplifiers with Increased Output Voltage — V. Yu. Romanov, V. N. Baryshnikov, P. V. Vnukov, and F. I. Panachev 1345 101
Generator of Linear Voltage of Asymmetrical Shape — A. Yu. Vinogradov and E. B. Ivkin 1347 103
Simple Gunn Oscillators — G. G. Tovmasyan, É. R. Amizyan, and A. G. Gulyan 1349 105

Volume 28, Number 6, Part 2 November–December, 1985

ELECTRONICS AND RADIO ENGINEERING
Microwave Generator with Regulated Output Power — S. I. Sharamentov 1353 107
Frequency Regulation of Amplitude-Modulated Reflex Klystron — A. A. Belov and I. V. Yaminskii 1356 109
Resonator with Magnetic-Field Concentrator for Study of Specimens under Axial Compression — V. D. Prozorovskii and I. Yu. Reshidova. 1357 110
Attachment to Multipulse NMR Spectrometer for Observing Nuclear Quadrupole Resonance Signals of ^{14}N Nuclei — K. V. Ermolaev, V. P. Tarasov, and L. N. Erofeev 1359 112
Computer-Controlled Time-Interval Generator for Pulse EPR Relaxometer — S. D. Safonov, V. N. Dudkov, I. V. Nyrtsov, V. I. Muromtsev, V. G. Ivanov, and V. N. Sukharev 1361 114
Magneto-Optical Transducer for Alternating and Pulse Currents — V. B. Arkhangel'skii, S. F. Glagolev, V. P. Zubkov, and T. G. Palei 1363 116
Thyratron-Choke Switch for High-Current Nanosecond Pulses — V. A. Vizir', N. G. Shubkin, A. V. Laier, and V. V. Chervyakov 1366 118
Wideband Actual-Power Meter — E. I. Linder and V. N. Gun'kin. 1370 121
Coaxial Pulse Matching Transformer — V. V. Ledenev and L. T. Khimenko 1372 123
GENERAL EXPERIMENTAL TECHNIQUES
Electron Gun with Cylindrical Window — Yu. V. Grigor'ev and A. V. Stepanov 1375 126
Apparatus for Study of Gas-Discharge Impedance — V. E. Privalov and E. A. Smirnov 1377 127
High-Voltage Vacuum Lead-In — L. G. Vintizenko 1380 130
Hodoscope Photomultipliers with Increased Space Resolution — V. G. Vasil'chenko, V. N. Evdokimov, V. E. Rakhmatov, V. B. Rakhmatova, and V. I. Rykalin 1382 132
Study of Photomultiplier Anode-Current Variation with Pulse Gamma-Neutron Irradiation — S. N. Makeev, V. A. Petrov, V. G. Popov, I. M. Smelyanskii, and N. M. Trubitsyn 1386 135
Determination of Optimum Operating Parameters of Single-Electron Photomultiplier — A. A. Lukichev, A. L. Shalyapin, and B. V. Shul'gin 1388 137
Linear Laser Mass Reflectron — I. D. Kovalev, N. V. Larin, A. I. Suchkov, A. M. Voronov, and P. A. Shmonin 1391 139
Ion Source for Desorption and Ionization in Strong Electrostatic Field for MKh1320 High-Resolution Mass Spectrometer — V. G. Golovatyi, V. P. Shabel'nikov, and I. V. Shpakovskii 1394 142
Determination and Automatic Control of Optical Thickness of Scanning Fabry-Perot Interferometer — Yu. V. Evdokimov, L. L. Kravchinskii, and M. B. Shtenger 1397 144
Sampling Spectral-Line Intensity and Width Meter — K. P. Kureichik, A. S. Khomyak, and N. V. Kozlovskii 1401 147

Nanosecond Light-Pulse Generator — M. V. Novakovskii and V. P. Stas'ev. . . .	1404	150
Controller for Laser Modulator — E. V. Nilov and V. A. Rusov	1406	152
Photodetector for Semiconductor-Laser Pulses — A. I. Naidenko, P. V. Mindra, S. A. Bobrikov, and G. G. Andrievskii	1408	154
Laser Frequency Selectors based on ML-3, ML-4, and ML-5 Electro-Optic Modulators — E. N. Dvoryaninov, A. P. Savikin, and V. B. Tsaregradskii .	1410	155
High-Speed Precision Photometry System for Automatic Microdensitometer — M. P. Grishin, Sh. M. Kurbanov, T. A. Svyatoslavskaya, N. L. Svyatoslavskii, and E. I. Chernov	1412	157
Magnetic-Flux Concentrator of Oriented Dysprosium — A. S. Bulatov, S. I. Goridov, and P. A. Kutsenko.	1416	161
Strength of Cemented Multilayer Solenoid Windings — Yu. K. Katrukhin, and A. P. Doroshenko	1418	162
Automatic Device for Resonance Measurement of Propagation Time of Elastic Waves in Solids at High Pressures — Yu. S. Il'inykh and S. S. Sekoyan. . .	1421	165
Squid-Based Residual-Resistance Meter for Pure Metals — S. Mészáros, K. Vad, and D. Novák	1424	167
Squid-Based Picovoltmeter for Measuring Resistance of Metals at Low Temperatures and Volt–Ampere Characteristics of Superconductor Structures — I. Ya. Krasnopolin	1427	170
Automated Apparatus for Measuring High-Frequency Volt–Farad Characteristics of Metal–Dielectric–Semiconductor Structures — A. P. Kovchavtsev, S. M. Krytsyn, V. G. Polovinkin, and N. I. Khaliullin.	1431	174
Apparatus for Measuring Fast Relaxation Processes in Extrinsic Photoconductors — A. G. Zhdan, I. I. Zasavitskii, T. M. Lifshits, V. V. Ryl'kov, and A. P. Shotov	1435	177
Electronic Model of p–n-Junction Depletion-Layer Capacitance — V. V. Denisenko	1439	180
Electrochemical Apparatus for Automatic Measurement of Carrier-Concentration Distribution in Semiconductors — N. A. Belova, L. A. Galchenkov, and N. E. Skvortsova	1441	182
Photoluminescence Power and Quantum Yield in Narrow-Gap Semiconductors — S. I. Zolotov and A. É. Yunovich	1445	185
Field-Ion Microscope with Plasma Preparation of Specimen Surface — A. L. Suvorov, A. F. Bobkov, S. V. Zaitsev, and V. A. Kasatkin	1448	188
Two-Component Constant-Temperature Hot-Wire Hydrometer with Digital Signal Recording — V. P. Petrov and V. I. Sugrei	1452	192
Automatic Low-Temperature Calorimeter — V. M. Malyshev, G. A. Mil'ner, E. L. Sorkin, and V. F. Shibakin..	1456	195
Use of Rubin-3 Thermal Sight for Dynamic Temperature Measurement — V. V. Babichev, V. N. Baskakov, A. I. Kostoglotov, and Yu. I. Yunak	1459	197
LABORATORY TECHNIQUES		
Dynamic Controller for Seven-Segment Vacuum Fluorescent Displays — S. N. Lekhin and S. V. Tarasenko	1461	199
Acicular Emitter Thermocouple for Mass Spectrometry — S. P. Gnatyuk, N. N. Grishin, and V. B. Labintsev	1463	201
Device for Specimen Transfer to Manipulator of High-Vacuum Chamber — B. M. Vermenichev and M. G. Maratkanova	1466	203
Seal for Specimen-Preparation Chamber of ÉS-2401 Electron Spectrometer — N. I. Zaretskii	1467	204
Removal of Vitreous Insulation from Microconductors — E. A. Kolenko	1469	205
Compact Independent Fixed-Pressure Chamber for Powders — A. V. Umarov, U. Abdurakhmanov, A. R. Faiziev, and M. A. Magrupov	1470	206
Electrodynamic Projectile-Velocity Meter — G. N. Korostelev, and V. A. Romantsev	1471	207
Gas-Composition Tester — V. V. Karpukhin, A. V. Kulikov, and S. V. Trusov	1473	208
Apparatus for Chemical Cutting of Oriented Crystals — I. K. Zasimchuk, D. E. Ovsienko, A. V. Fomin, V. Z. Balan, V. N. Kozitsyn, and N. E. Sinitskii	1476	210
